## INTRODUCTION AND OBJECTIVES

- ❖ Identification of information needs of cataract patients and development of training recommendations for patients in the postoperative period.
- ❖ Research Question: What information does a cataract patient need in the postoperative period to maintain a favorable outcome?

## METHODS

- ❖ Quantitative method.
- ❖ Postoperative survey of 55 patients diagnosed with cataract.
- ❖ Statistical methods.
- ❖ Analyze the data obtained as a result of patient questionnaires.

## RESULTS

- ❖ The results of the study showed that in order to provide quality nursing care and information to patients with cataracts after surgery using the FLACS with IOL method , it is necessary to develop and implement information booklets, brochures containing all the necessary aspects and issues regarding the postoperative stage.

## CONCLUSIONS AND IMPLICATIONS

- ❖ Thus, in the course of our research, we came to the conclusion that patients need medical professionals not only to tell them about disease, but also at the end they need to be handed out with brochures or booklets.
- ❖ The purpose of the booklet is to include as much information as possible in accordance with the patient's needs.
